

尚卓燃 ("PsiACE")

Agent 系统工程师 · OceanBase（蚂蚁集团）高级工程师 · ASF Member

@ psiace@apache.org 尚卓燃 psiace.me 尚卓燃 PsiACE 尚卓燃 PsiACE 尚卓燃 杭州

Agent 系统工程师，现负责 OceanBase 的上下文产品、数据库原生智能体能力与开源工具链。此前参与 Databend 核心系统研发，并在 NebulaGraph 负责 GraphRAG 与 GenAI 平台工程。

Achievements/Certifications

Agent Client Protocol Python SDK

- 创建并维护 ACP Python SDK，为 Agent 与编辑器、客户端的互操作提供类型化 schema、异步 transport 和生命周期抽象。累计下载超 1 亿，被 kimi-cli、mistral-vibe 等产品使用。

Bub 与 tape.systems

- 设计与实现 Bub，一个面向共享环境与长期协作的 hook-first Agent runtime，已获得 1.6k+ GitHub Stars。提出以只追加记录组织 Agent 历史、状态与上下文的 tape 模型，该模型已用于 Bub 与 DeepChat。

Fusion GraphRAG

- 负责 Fusion GraphRAG 的设计与交付，选定业务场景问答精度约 95%；同等算力下，相比公开基线将首答可用时间缩短 80%。

ASF Member 与 Apache OpenDAL

- 作为 ASF Member 和多个 Apache 项目的 Committer 或贡献者，参与 Apache OpenDAL 的孵化与毕业，项目现已被 LanceDB、Milvus 等系统采用。

Experience

高级工程师

OceanBase（蚂蚁集团）

2025 年 12 月 — 至今

中国杭州

- 负责 OceanBase 面向 Agent 的上下文产品建设，研发数据库原生的智能体能力与开源工具链。
- 推动 AI / Agent 能力与 OceanBase 开源生态融合，改进相关工具的开发体验，推进上下游协作。

GenAI 平台工程师

Vesoft Inc. (NebulaGraph)

2024 年 9 月 — 2025 年 12 月

中国上海

- 负责 NebulaGraph GenAI 平台工程化，面向复杂领域问答建设上下文构建与检索链路。
- 负责 Fusion GraphRAG 的设计与落地，将方案集成到可部署的领域问答系统中。

核心研发工程师

Databend Labs（云原生数据仓库） - Databend

2021 年 7 月 — 2024 年 8 月

远程

- 创始团队成员之一，参与重大架构演进，主导模块化拆分、编译性能优化和首个持续 benchmark 方案。
- 推动与 HuggingFace、lakeFS、KubeSphere 等项目集成，扩展数据湖与云原生场景的适配范围。

Objective

构建面向生产环境的 Agent 系统，让上下文与执行状态可管理、可追踪，并将相关能力沉淀为可长期维护的产品和开放协议。

Education

澳门科技大学

2022 年 9 月 - 2024 年 8 月

中国澳门

硕士 in 应用数学与数据科学

华中农业大学

2017 年 9 月 - 2021 年 6 月

中国武汉

学士 in 计算机科学与技术

Skills/Exposure

- Agent Runtime / 上下文工程
- Agent 协议与互操作
- RAG / GraphRAG 与评测
- 分布式系统 / 数据基础设施

Methodology/Approach

- 显式状态与故障恢复
- 评测驱动迭代
- 以开发者体验为中心
- Apache Way 与开放协作

Tools

- Rust / Python
- LLM API / Tool Calling
- ACP / MCP
- Kubernetes / Docker
- GitHub Actions

Chojan Shang ("PsiACE")

Agent Systems Engineer · Senior Engineer at OceanBase (Ant Group) · ASF Member

@ psiace@apache.org < psiace.me @PsiACE PsiACE Hangzhou, China

Agent systems engineer at OceanBase focused on context products, database-native agent capabilities, and open source tools. Previously worked on Databend's core systems and led GraphRAG and GenAI platform engineering at NebulaGraph.

Achievements/Certifications

Agent Client Protocol Python SDK

- Created and maintain the ACP Python SDK, with typed schemas, async transports, and lifecycle abstractions for agents, editors, and clients. It has over 100 million downloads and is used by products including kimi-cli and mistral-vibe.

Bub and tape.systems

- Designed and implemented Bub, a hook-first agent runtime for shared environments and long-running work, with 1.6k+ GitHub stars. Proposed the append-only tape model for agent history, state, and context, now used by Bub and DeepChat.

Fusion GraphRAG

- Led Fusion GraphRAG design and delivery. It reached about 95% accuracy in selected scenarios and cut time to first usable answer by 80% against public baselines on the same compute.

ASF Member and Apache OpenDAL

- ASF Member and Committer or contributor to several Apache projects. Helped OpenDAL graduate from the Apache Incubator. LanceDB, Milvus, and other systems now use it.

Experience

Senior Engineer

OceanBase (Ant Group)

Dec. 2025 — present

Hangzhou, China

- Build context products, database-native agent capabilities, and open source tools for OceanBase.
- Integrate AI and agents into OceanBase open source. Improve developer tooling and upstream and downstream collaboration.

GenAI Platform Engineer

Vesoft Inc. (NebulaGraph)

Sep. 2024 — Dec. 2025

Shanghai, China

- Led NebulaGraph GenAI platform engineering, including context construction and retrieval for domain Q&A.
- Led Fusion GraphRAG design and delivery and integrated it into a deployable Q&A system.

Core Engineer

Databend Labs (cloud-native data warehouse) - Databend

Jul. 2021 — Aug. 2024

Remote

- Founding team member who led major architecture changes and modularization. Also improved compile times and built the first continuous benchmark.
- Integrated Databend with HuggingFace, lakeFS, and KubeSphere to support data lake and cloud-native use cases.

Objective

Build agent systems for production, where context and execution state are manageable and traceable. Develop these capabilities into maintainable products and open protocols.

Education

Macau University of Science and Technology

Sep. 2022 - Aug. 2024 Macau, China

M.Sc. in Applied Math & Data Science

Huazhong Agricultural University

Sep. 2017 - Jun. 2021 Wuhan, China

B.Eng. in Computer Science

Skills/Exposure

- Agent Runtime / Context Engineering
- Agent Protocols & Interoperability
- RAG / GraphRAG & Evaluation
- Distributed Systems / Data Infrastructure

Methodology/Approach

- Explicit State & Failure Recovery
- Evaluation-driven Iteration
- Developer Experience First
- The Apache Way & Open Collaboration

Tools

- Rust / Python
- LLM APIs / Tool Calling
- ACP / MCP
- Kubernetes / Docker
- GitHub Actions
